

## **LCAP JUST GOT EASIER**

VitalInsight™ technologies make it much easier in a few short weeks to collect meaningful data, establish appropriate goals within the LCAP priorities, and identify effective, proven strategies that will produce the results you want.

### **Spend less time:**

- Attending tedious meetings brainstorming about perceived needs for improvement
- Gathering data that will have dubious value when putting improvement plans together
- Dealing with opinions that move the group's direction further from practices that are likely to produce better results.

### **Invest your time:**

- Analyzing comprehensive data that reveal existing performance strengths
- Understanding which vulnerabilities exist through the diagnostic process
- Selecting the range of prescriptive best practices that could be used by you to design improvement plans

### **Implement Quickly:**

- A VitalInsight™ representative will provide a description of how the process and reports can be generated in as little as two weeks
- From VitalInsight's library of over 8000 best practices, you will receive over 20 prescription options for each goal
- Following the selection of most likely successful prescriptions, implementation can begin immediately

### **Results:**

VitalInsight usually is used over 2-4 years in order to monitor progress and report needs for adjusting the prescriptions. In a five year efficacy study published in AASA School Administrator magazine, plans based on VI data were documented to:

- Increase student achievement by double digits in every grade for four years
- Increase teacher effectiveness and collaboration
- Increase parent and stakeholder trust in school teachers and leaders
- Improve team work and problem solving
- Increase student engagement
- Fulfill state planning requirements

We would be happy to share with you how VitalInsight™ can remove much of the pain in LCAP planning and improvement processes efficiently and inexpensively.

### **Getting Started**

Contact me to help you meet and exceed the LCAP requirements. The cost is less than what you will spend on guided planning sessions.
